Preface

The Statistical Yearbook of Iran contains the latest statistical information available on the country's economic, social, cultural, and political areas to meet the statistical data needs of decision-makers, planners, and researchers, as well as all other interested users. The Yearbook has been released regularly since the year 1345.

The major sources of the Yearbook include: (a) the results of censuses and sample surveys conducted by the Statistical Centre of Iran (SCI), (b) administrative registers, and (c) the results of surveys conducted by other government organizations. Since the Population and Housing Census and also some other censuses and surveys conducted by the SCI or other organizations are not taken at regular intervals, some of the Yearbook's statistical items are not available annually and continuously.

In order to provide important and basic statistical information in a timely manner to meet the statistical needs of the users and to minimize their in-person visits to numerous organizations producing statistics, the Statistical Centre of Iran prepares, compiles and publishes various statistical publications in a timely manner, especially the "Statistical Yearbook of Iran" and designed the statistical information database.

The publications' information database of the Statistical Centre of Iran, as one of the components of the National Statistical Information Database, has been accessed on the web since the year 1381 through the National Statistical Portal at www.amar.org.ir. In this database, which is continuously provided with statistical information, quick and easy access is provided to the information of the publications' tables of the SCI by using extensive search facilities, and currently, the information related to the National Statistical Yearbook 1400, is available to users in the section of statistical yearbook of the National Portal of Statistics. In addition to the mentioned database, the information of the National Statistical Yearbook for the years 1387 to 1395 is accessible through the electronic system of this publication with various capabilities at <http://salnameh.sci.org.ir>.

The 1400 Statistical Yearbook of Iran is released both in Persian and English. The Persian version is published in both hard and soft copies. However, the English version is released just in soft copy, moreover, both Persian and English e-copies are also available to the users on www.amar.org.ir (the English version of the Website). In addition, at the same time as the release of the statistical yearbook of the country, the statistical yearbooks of 31 Ostans (provinces) are prepared and published by the Management and Planning Organization of the Ostans with a similar format under the supervision of the Statistical Center of Iran.

Before going through the chapters, users are recommended to study the introductions which take in the definitions and concepts concerned and the subject-matter coverage of the statistical items, as important points needed for the statistics of each Chapter, carefully. Furthermore, they provide readers with justifications for the unavailability of some timely data or the exclusion of some statistical items.

It is noteworthy that the yearbook starts with selected information from all chapters and the beginning of every chapter includes selected information from that chapter. In order to have a general view of all information presented in the Yearbook, reading of these parts is recommended.

Particular thanks and appreciation are extended to all ministries, Islamic Revolution Organizations and Institutions as well as the Director-Generals of Statistics and Information Offices of the ministries, institutions and organizations, and all their colleagues who helped us in this great job. Their generous and valuable assistance contributed a lot to the preparation of the Yearbook. We hope to enjoy their cooperation and contribution continuously to enhancing the yearbook quantitatively and qualitatively. Special thanks should go to my colleagues in the Statistical Centre of Iran who contributed to the preparation and production of this publication.
