

### *Introduction*

Survey of national mines-related activities and the continuous dissemination of its results began by the then Ministry of Industry, Mine and Trade in the year 1333. Related statistics were published annually in the attachment of the publication “Statistics on Manufacturing Activities” until the year 1339, but they have appeared in a separate publication ever since under the title of “Statistics on Mineral Activities of Iran”. The first census of mines of the country was carried out in the month of Azar in the year 1342 by the Ministry of Economy. Statistical Bureau of the Ministry of Economy collected and published statistics on mines-related activities annually from the year 1342 to the year 1353, using statistics from nationwide mines registers and records. The second census of mines of the country was conducted with the cooperation of the SCI and the Ministry of Industry, Mine, and Trade in the year 1353. The SCI used to conduct a survey of a selected number of mines annually from the year 1353 to the year 1357. This part of the economic activities suffered from the lack of statistics from the year 1357 to the year 1363, because in the interim, neither were statistical surveys implemented nor were comprehensive registers made available. The SCI conducted a survey of mines, run by the public sector in the years 1364 and 1365, and also carried out the third census of mines of the country in the year 1366. The survey of mines has been conducted every year from the year 1367 to the year 1397 except for the years 1370 and 1384.

The data presented in this chapter are from the aforementioned censuses and surveys as well as data from the mineral cooperative companies reported by the Ministry of Cooperatives, Labor and Social Welfare.

***On the statistics presented, it should be noted that:***

1. In the survey of the operating mines of the country, statistics on oil and gas, radioactive materials, and clay were not collected. However, due to the special importance of oil and gas statistics, the related information is presented separately in Chapter 7 (Oil and Gas).

2. In the survey of operating mines, sand and gravel mines are enumerated by sample survey, and other mines by the census.

3. The ISIC Rev.4 is followed with appropriate modifications for the classification of mine sector activities in this chapter.

### *Definitions and concepts*

***Mine:*** It refers to an area which contains mineral deposits.

***Ore dressing:*** It refers to all physical, chemical, or physicochemical operations for separating waste materials from ores or for separating ores from one another.

***Operating mine:*** It refers to every mine in which some operations are conducted for extraction, dressing activities, and the production of marketable ores.

***Private management:*** It refers to the management exercised by individuals or private institutions.

***Public management:*** It refers to the management exercised by ministries, government organizations, Islamic Revolution Foundations, banks, municipalities, and other public institutions.

***Mine workers:*** They are all individuals working full-time or part-time in mine-related activities inside or outside of the mine and include wage and salary workers, owners and active partners, and unpaid family workers.

***Production line skilled workers:*** They refer to employed persons capable of performing a part of technical activities related to the production line due to their know-how and experience. Engineers, technicians, craftsmen, foremen, skilled laborers, fitters, and drivers are some examples.

***Production line unskilled workers:*** They refer to persons working in the production line whose jobs do not require any specific training or experience, such as laborers, porters, and stevedores.

***Other workers (administrative, financial and service):*** They refer to employed persons engaged in clerical, administrative, financial, and service activities in mines or their central offices but not engaged directly in extraction and production activities.

In the presentation of statistics on employed persons, it is noteworthy that the method of "average number of employed persons per year" has been employed in the calculation.

**Compensation of employees:** This refers to wages, salaries, and other cash and non-cash payments to wage and salary earners.

**Mineral products:** This refers to all minerals obtained from a series of extraction activities that make them marketable. It should be mentioned that in some mining activities, minerals are supplied to the market without undergoing the dressing process, whereas in other mineral activities, minerals are supplied to the market after a series of physical and/or chemical treatments for separating some of the waste from ores, separating ores from one another, or increasing the fineness of raw material. In addition, in one mining activity, several minerals may be produced. For example, copper ore mining includes the production of copper ore and copper and molybdenum concentrates.

**Value of mine products:** It is the total value of saleable mine products, including raw and processed minerals, based on the sale prices at the mine site.

**Investment in mining (value of changes in non-financial assets):** It refers to the total value of non-financial assets purchased, acquired, and created by the mine, major repairs performed on non-financial assets, and investment in development and exploration, less the value of sales of non-financial assets per year.

**Value added:** This is a measure of the contribution of a producer, an industry, or a sector to the gross domestic product and is the source of primary income generation.

**Value of receipts (outputs) in the mine:** This refers to the total value of mine products that can be supplied (sold), including raw and processed minerals based on the sale price at the mine, the value of construction and major repairs of capital assets (property) by mine workers, and the value of other receipts for productive and non-productive services such as contract works, minor repairs of buildings and office supplies and equipment, minor repairs of laboratory equipment, sale of water and electricity, cooked food, etc.

**Value of payments (inputs) in the mine:** This refers to the total value of materials, nondurable tools and equipment, spare parts, fuel, explosives,

water, electricity, and other payments for productive and non-productive services such as contract works, minor repairs of machinery, buildings, laboratory equipment, office supplies, and equipment, etc.

**Cooperative:** This is a company consisting of at least seven members, whether natural or legal, to fulfill the common needs and improve the socio-economic conditions of members via self-aid and their mutual support according to the law of the cooperative sector, which has been formed and registered to carry out one or more economic activities.

**Mines cooperative:** This is a cooperative that engages in the extraction, exploitation, and sale of minerals extracted from operating mines.

### *Selected information*

According to the results of the national operating mines survey in the year 1401, there were a total of 5761 operating mines in the country. The results show that a total of 133962 workers were employed in these mines, and the number of workers increased by 2.76 percent compared to the year 1400.

In the year 1401, the value of mine products amounted to 3116428 billion rials. Iron ore, copper ore, and lead and zinc ore, with 1807443 550627 and 328489 billion rials, accounted for the highest annual production value, respectively. In the year 1401, the value added of the nation's operating mines activity amounted to 2,617,153 billion rials. Iron ore, copper ore, lead, and zinc ores, with 1,458,738, 493,325, and 317,626 billion rials, had the highest value added, respectively. The total value added of these mines accounted for about 86.7% of the sector's total value added.

Moreover, Kerman, Yazd, and Khorasan-e-Razavi Ostans (provinces), with 1,100,448, 566,304, and 247,119 billion rials, had the highest value added of the nation's operating mines among Ostans.

In the year 1401, an amount of 133,412 billion rials of new investment was made, of which about 80% was related to machinery, durable tools, and office equipment; 8% was for construction and installations (without land); 6% was related to vehicles; and 3% was for development and exploration.

### 6.1. NUMBER OF MINES, WORKERS, COMPENSATION OF EMPLOYEES AND VALUE OF PRODUCTION IN OPERATING MINES BY OSTAN, THE YEAR 1401 (mln rials)

| Year and Ostan              | Number of mines |                    |            | Number of workers    |                 |              |                                                       |

1. Excluding the workers of mines in which part of the extraction activities was outsourced according to a contract in the year 1387 and before that.

2. Statistics for sand and gravel mines obtained from the sampling survey were generalized to the whole country, which has caused differences between the total and the sum of parts in some cases.

3. Information on how private and public management is conducted for the year 1398 cannot be provided.

#### 6.4. VALUE OF MINERALS PRODUCTION IN OPERATING MINES BY TYPE OF ACTIVITY, THE YEAR 1401 (mln rials)

| Activity                                        | Value of production |
|-------------------------------------------------|---------------------|
| <b>Total.....</b>                               | <b>3116427857</b>   |
| Mining of hard coal.....                        | 69263109            |
| Mining of iron ore .....                        | 1807443331          |
| Mining of lead and zinc .....                   | 328489420           |
| Mining of gold ore .....                        | 32613636            |
| Mining of copper ore.....                       | 550626769           |
| Mining of chromite .....                        | 6331599             |
| Mining of manganese.....                        | 4060044             |
| Mining of bauxite.....                          | 4112863             |
| Mining of nickel, antimony and titanium.....    | 167062              |
| Mining of gravel and sand.....                  | 81285006            |
| Mining of decorative stones .....               | 77254339            |
| Mining of rubble stone .....                    | 17571555            |
| Mining of ballast stone.....                    | 279925              |
| Mining of lime stone .....                      | 65693964            |
| Mining of gypsum.....                           | 11015594            |
| Mining of kaolin, fireclay, and.....            | 14607547            |
| Mining of dolomite .....                        | 1097649             |
| Mining of bentonite's and fuller's earth.....   | 1261251             |
| Mining of clay .....                            | 127287              |
| Mining of barite .....                          | 2103325             |
| Mining of strontium sulphate & boron.....       | 2124320             |
| Mining of sodium sulphate .....                 | 4728151             |
| Mining of limonite and ferrous oxide .....      | 101920              |
| Mining of fluorine .....                        | 690061              |
| Mining of phosphate, potash & iodine .....      | 7895009             |
| Mining of salt .....                            | 2598863             |
| Mining of bitumen .....                         | 2679953             |
| Mining of silica .....                          | 11387587            |
| Mining of ores slag .....                       | 2031006             |
| Mining of feldspar.....                         | 3987074             |
| Mining of talcum.....                           | 264037              |
| Mining of shell & mica .....                    | 134993              |
| Mining of magnesite and whiting .....           | 1787727             |
| Mining of precious and semi-precious stone..... | 611884              |
| Mining of other mines n.c.e .....               | 0                   |

1. Excluding non-operating cooperatives as of the year 1399.

2. The decrease in the amount of capital in cooperatives in the year 1401 compared to previous years is due to the fact that in the year 1400 and before, the data was based on self-reporting, whereas in the year 1401, it was based on both self-reporting and the provision of written documents from cooperatives.

3. Differences between the total and the sum of parts is due to the inclusion of the statistics for Free Trade, Industrial and Special Economic Zones in the total.
